

Hookless®

Vinyl Shower Curtain Care Instructions

Hookless® Flex-on® technology is protected under one or more of the following US Patents 5,186,232 - 6,494,248B-1, 6,189,597B-1 and other pending International Patents

Manufactured by Arcs & Angles, Inc.

Fastest and easiest way to beautify your shower!
The built in Hookless® Flex-on® rings do it all!

Patented technology means-

·No Clumsy or Expensive Hooks **·No Need to Remove Shower Rod**

Arcs & Angles' quality means-

·Easier to maintain **·More durable** **·Mildew resistant**

Curtain shown for illustration only

Care: Keep your vinyl shower curtain looking fresh with periodic cleaning. Wipe entire curtain with mild and non abrasive soap solution. Rinse thoroughly and let hang freely outside the tub - not sticking to wall or tub - and allow to air dry.

Content: 100% Vinyl (exclusive of rings)

Instructions: Please read instructions before hanging your **Hookless®** Shower Curtain

Cuidado: Mantenga su cortina de baño de vinilo luciendo nueva mediante limpiezas periódicas. Limpie la cortina entera con una solución de jabón ligera y no abrasiva. Enjuáguela y déjela colgar libremente afuera de la bañera – no pegada a la pared o bañera – y déjela secar al aire libre.

Contenido: Vinilo 100% (excluyendo los anillos)

Instrucciones: Por favor lea las instrucciones antes de colgar su cortina de baño **Hookless®**.

Hookless®

Installation Instructions

**Fastest and easiest way to beautify your shower!
The built in Hookless® Flex-on® rings do it all!**

Para colgar una cortina de baño Hookless®, párese afuera de la bañera mirando hacia dentro. Agarre la parte superior de uno de los pares de anillos (con la abertura que está entre medio) con ambas manos.

To hang a Hookless® shower curtain, stand outside the tub and facing in. Grasp the top half of a pair of rings (with slit between them) with both hands.

Cuidadosamente empuje la mitad superior de los anillos sobre la varilla de la bañera. La parte inferior de los anillos seguirá bajo la varilla. Las aberturas desaparecerán magicamente. Continúe hasta completar.

Gently push top half of rings over the shower rod. The lower half of rings will follow under rod. The slits magically disappear. Continue until complete.

Una vez instalada correctamente, los bordes de la cortina estarán mirando hacia afuera y las aberturas estarán por debajo de la barra.

When installed correctly, the curtain's side edges will face out and the slits will be behind the bar.

Some information about mold and mildew: All Hookless® vinyl shower curtains are treated with a biocide that makes them resistant to the formation of mold and mildew. In the event that any mold appears, it is due to the fact that soap scum has been allowed to accumulate on the surface of the curtain. The scum is a food source for the mold. Attention to the care instructions will add to the overall life and appearance of the vinyl product.

Hookless® fabric shower curtains are NOT treated with a biocide because it would wash out after only two to three washings and we therefore consider it pointless! Once again, the culprit is the soap scum which is a food source for the bacteria (mold & mildew). Following our care instructions, will give you problem free and hygienic product. Oxygen bleach is an excellent product that helps to eliminate tiny air-borne mold spores that cling to the fabric fibers.

Waterproof: All Hookless® vinyl shower curtains are 100% waterproof which means that water cannot migrate through the material.

Water repellent: Most Hookless® fabric shower curtains require no liner because they are treated with a water repellent finish. With this treatment, water will "bead" off the curtain. It is not recommended that a shower nozzle be aimed directly towards the fabric, as some water can migrate through the curtain.

You will always extend the usable life of your Hookless® fabric shower curtain if you protect it with a Hookless® liner.
